publicworksinfo@orangeville.ca

Permit Conditions:

Permit General Conditions

Each and every Permit issued pursuant to this Bylaw shall be subject to the following conditions:

1. the Earthwork on the Permit Lands shall be such that positive gravity drainage is assured and that such drainage is by gravity to a Natural Watercourse or a public drainage facility adequate for the purpose. This clause shall not be construed to prevent the operator from establishing a settling pool;
2. all damage to municipal or privately owned drainage facilities, roads, Utilities statutory rights of way or lanes, or other municipally or privately owned property or Natural Watercourse, resulting from the excavation or the Removal of Soils, shall be repaired;
3. all drainage facilities and Natural Watercourses shall be kept free of silt, clay, sand, rubble, debris, gravel and any other matter or thing originating from any excavation of any Lands and which are causing obstruction to such drainage facility or Natural Watercourse;
4. drainage facilities or Natural Watercourses shall not be impacted;
5. stockpiles shall be confined to the Permit Lands and the same shall be maintained so they do not adversely affect or damage adjacent properties or sight lines;
6. the Earthwork shall not encroach upon, undermine or physically damage any property, or any property/works of the Town whether or not located within a statutory right of way, or make impractical the future subdivision or development of the Permit Lands for which a Permit has been issued on neighbouring land;
7. storm water may not drain onto Town or private property unless into a drainage facility approved by the Director;
8. no Earthwork may occur next to adjoining Land that would result in a vertical cut of more than 1.0m to the Land on which the Earthwork is to take place;
9. no Natural Watercourse shall be altered or diverted, except with the approval of the Director and or Credit Valley Conservation;
10. that no Earthworks shall occur on environmental protection areas or riparian areas as determined by the Town and Credit Valley Conservation;
11. that all excavation and Stockpiling on Permit Lands and all other hazards shall, if required by the Director, have adequate fencing and be provided with suitable buffer zones or landscaping screens, suitable weather proof signs which shall be mounted and maintained on the fence at a linear distance not to exceed one hundred fifty (150) meters with wording to indicate the danger, the nature of the Earthwork, the presence of excavation and prohibiting the presence of the public;
12. that all Earthwork undertaken shall be done according to the terms of approval of the Director and may require a Professional Engineer to supervise the work;
13. that all Earthwork shall be subject to a continuous program of dust control to the satisfaction of the Director;

Site Specific Conditions:

14. that all access to the site be from the intersection of Hansen Boulevard. There shall be no access from Parkinson Crescent (no exceptions);
15. that the proponent not start any work on the site until a site meeting has taken place between all parties involved including the Town of Orangeville;
16. that the proponent undertake a street sweeping program and provide a schedule of said activities to the satisfaction of the Town of Orangeville.
